Professional Experience

Full Stack Developer | Radix Company

May 2025 - May 2026| Nablus, Palestine

- Developed and maintained enterprise web applications using Angular, TypeScript, Angular Material, and Sass.
- Built Admin, Super Admin, and Marketing Dashboards with role-based access control and authentication.
- Integrated Meta Ads, Google Ads, and Google Analytics APIs for campaign management and performance reporting.
- Developed REST APIs and worked with PostgreSQL for data management and analytics reporting.
- Implemented CRUD operations, reusable components, and responsive user interfaces.
- Collaborated with the development team using Jira and Agile workflows to track tasks, bugs, and releases.

May 2024 - Sep 2024| Nablus, Palestine

- Built and optimized UI features with Angular, Sass (PrimeFlex), and Angular Material, improving responsiveness and consistency.
- Delivered new features, fixed bugs, and ensured scalable, maintainable solutions through team collaboration.

Frontend Trainee | ASAL Company **Feb 2024 - May 2024| Nablus, Palestine**

- Gained hands-on experience in web development using HTML, CSS, JavaScript, and TypeScript.
- Built and styled responsive web interfaces with React.js, Next.js, and SASS.
- Applied best practices in front-end development to create scalable and maintainable code.

Frontend Trainee | Foothill Technology Solutions Company **Jul 2023 - Jan 2024| Nablus, Palestine**

- Developed responsive web applications with React.js, JavaScript, and TypeScript, delivering seamless user interactions and optimized UI using HTML, CSS, and DOM manipulation.
- Implemented advanced React concepts including design patterns, routing, and unit testing for robust, scalable, and maintainable code.
- Integrated Node.js for backend operations to enable smooth client-server data flow.
- Used Git for version control and applied testing tools like React Testing Library and Storybook to ensure component reliability and consistent user experience.

Volunteering Experience

Frontend Developer, Art to heart (charity organization) **Jul 2023 - Feb 2024**

- Collaborating with the frontend team to develop the organization's web platform using React.js and TypeScript.

Education

BSc. Computer Science Apprenticeship Program, Software Engineering, An-Najah National University **Sep 2020 - Jun 2024 | Nablus. Palestine**

GPA: 3.51

Projects

Starry Stay, Web app **Dec 2023**

A travel and accommodation booking web platform.

- Built a responsive booking platform using React.js and TypeScript with reusable components for web and mobile.
- Implemented routing with React Router and form handling using React Hook Form for smooth booking flows.
- Managed state with React hooks (useState, useEffect) to ensure dynamic UI behavior.
- Designed UI using Material UI, CSS Modules, and Figma for a clean and user-friendly experience.
- Integrated Axios for API communication, enabling real-time booking and backend interaction.
